ABOUT US

WHO ARE WE

Eaglesberg Projects and Services Limited EPSL is an integrated company which provide Electrical, Instrumentation and Project Mnt Services to Oil & Gas, Utilities, Construction, Manufacturing, Petrochemical, and other sectors.

EPSL on its own and through partnership, provide services in General Civil works, Maintenance and Construction, Heavy Equipment Hiring and Leasing, Solar Panel and Inverter installation, Electric Power generation and Estate management.

We take pride in providing our customers with the highest quality products and services. As an integrated company, we can assure our customers of unparalleled support for many years after sales and project completion.

OBJECTIVES

Our main objectives at Eaglesberg Projects and Services Limited **EPSL** are:

- To relieve clients of the responsibilities associated with the day? to day operations of their asset through a dynamic and unique offering.
- To our investors, we will always deliver a high yield investment portfolio and ensure that real value is added to their stakes.
- To our employees, we will endeavor to create a conducive working environment that will give them room to find fulfillment in their calling, improve their skill set and professional competence.
- To our community, we will be responsive and responsible in upholding their values especially with regards to making our operations as environment friendly as possible.

CORE VALUES

- Relentless, Enthusiasm, Attitude, Cooperation and Honor (REACH)

EPSL's ability to adapt to and accommodate foreign cultures and hire locally skilled personnel is a contributing factor to its successful operations.

PRODUCTS AND SERVICES

ELECTRICAL, INSTRUMENTATION AND MAINTENANCE SERVICES

- Installation and construction services
- Repair and Maintenance Services
- Valve Repair and Maintenance
- Transmitter Repair and Maintenance
- Rotating Equipment Maintenance
- Calibration and Recertification services
- Metering Services

PROJECT MANAGEMENT SERVICES

- Building, Installation and Construction of Photovoltaic PV System
 - Foundation Engineering and Rehabilitation works
 - Real Estate, Property Development and Management Services
- 

ELECTRICAL, INSTRUMENTATION & MAINTENANCE SERVICES

CONSTRUCTION SERVICES

We offer the following Instrumentation Construction Services:

- Control Room Instrumentation Works
- Cable Tray Support Erection
- Cable Laying
- Cable Gland and Termination Works
- Tuning of Air Header
- Hand Switch Installation
- LCS and LCP Installation
- JB Installation
- Control Valve, Solenoid Valve, All Types Of Gauge Installation
- All Types of Transmitter (Level, Pressure, Flow, Radar etc) Installation
- Instrument Calibration and Testing Works
- CCTV Installation
- Impulse Line

INSTALLATION SERVICES

EPSL provides specialized technical Instrumentation services:

- Repair and calibration of field instruments of any size or type.
 - Specialist knowledge on industrial projects for material selection and procurement.
 - Trained Instrument Technicians for installation, calibration, commissioning, fault identification and repair of Process Instruments across a variety of process industries.
 - Ability to pre-fabricate large control packages on or off site.
 - High tech security, control and safety systems (DCS: ABB, Emerson, Honeywell, Invensys, Siemens, Yokogawa etc.)
 - SCADA System
 - Consultation and support with engineering for project design, and project management.
- 

REPAIR & MAINTENANCE SERVICE

EPSL provides full range of repairs & maintenance services in the Oil & Gas, Power, Construction, Manufacturing, Petrochemical and other sectors.

We also provide technically sound and commercially attractive solutions to clients. All repairs are performed according to certifications and industry standards.

VALVE REPAIR & MAINTENANCE

VALVES are key component in the operations of most industrial processes. Valves often provide safety protection in an emergency and thus are expected to perform instantly and without a hitch every time they are needed.

EPSL provides full inline, onsite and shop valve repair services and maintenance for virtually all valve types, brands, sizes, materials, pressures and operating conditions, including actuators and

ROTATING EQUIPMENT MAINTENANCE

Our team of experts support clients in rotating equipment repair and maintenance-Reciprocating Engines, Reciprocating Compressors, Electric motors, Centrifugal compressors etc.

TRANSMITTER REPAIR & MAINTENANCE

Transmitters are used to measure various parameters such as pressure, temperature, and level, as well as control output signals in the process industry.

We help our clients minimize their transmitter downtimes by providing transmitter repair & maintenance services.

We can handle all types of issues such as corrosion, calibration problems, non-level transmissions, irregular temperature and pressure readings, and more.

Our technicians not only help our clients minimize their downtimes, but also guide them to avoid

CALIBRATION & RECERTIFICATION SERVICES

Accurate and Reliable measurements of (temperature, pressure, flow, level etc.) depends a lot on the calibration equipment and personnel involve in the process. This is to ensure the efficiency and quality of delivered products.

All our calibration equipment has current and valid test certificates, which are registered in a calibration equipment log. Recertification process is key for any equipment being calibrated for proper documentation.

CALIBRATION SERVICES

With our highly experienced and factory trained Technicians. We

- Provides fast, reliable fully equipped portable workshops to provide calibration service on site.
- Ensure accuracy to prevent waste or quality issue
- Ensure that our calibration operations are performed using SI traceable units.
- Ensure that no more waiting for service or shipping instruments off site when it's not required

RECERTIFICATION SERVICES

Recertification of all calibrated equipment is done and well documented. Details in the certificate shall be but not be limited to:

- Calibration body/authority
- Signature of technician
- Calibration certificate number
- Equipment description (make, type etc.)
- Calibration date
- Next Calibration due date

METERING SERVICES

We provide comprehensive range of metering services for oil and gas, commercial, industrial and for domestic energy use.

We have strategic alliances with OEMs and with our seasoned team of automation engineers, we are positioned to support our clients in designing, construction and high-accuracy metering installations

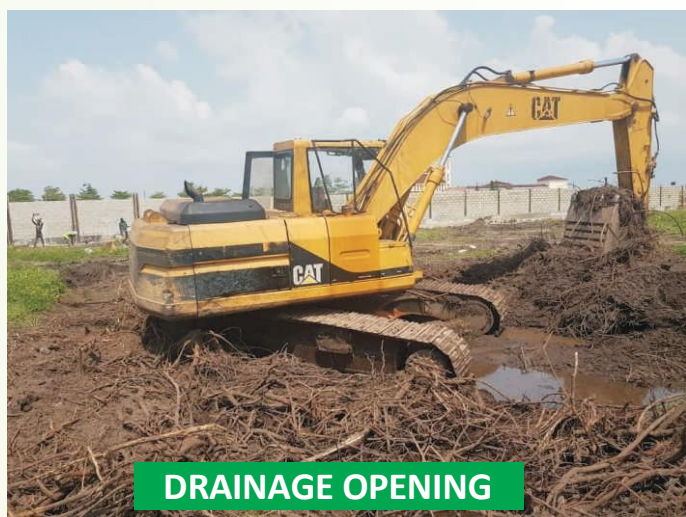

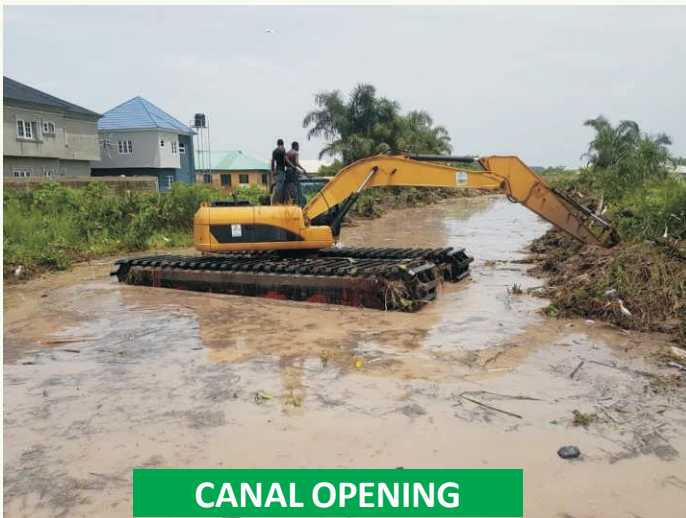

Our metering services include:

- Retail metering services
- Settlement verification and audits
- Meter system maintenance and repairs
- Meter data management
- Design, Procurement, Assembly, Site-installation and Commissioning
- IESO Wholesale Revenue Metering
- Metering Plans for PPAs

PROJECT MANAGEMENT SERVICES

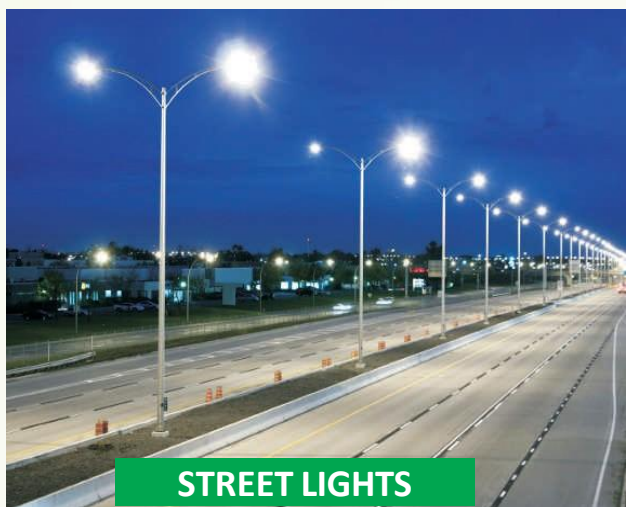

FOUNDATION ENGINEERING AND REHABILITATION WORKS

- Building and Road construction; Paving stones, Concrete Roads and Asphalt
- Land stabilization and Shore protection: Retaining Walls etc
- Equipment Hiring Services: Trucks, Payloader, Grader, Backhoe, Excavator etc

BUILDING, INSTALLATION AND CONSTRUCTION OF PHOTOVOLTAIC PV SYSTEM

- Streetlights, Solar Panels and Inverter Systems
- Energy Audits
- Training Program for Solar Energy Solutions – Panel and Inverter System

STREET LIGHTS

STREET LIGHT INSTALLATION

HYBRAID INVERTER

SOLAR PANEL

TRAINING

ENERGY AUDIT

REAL ESTATE AND PROPERTY DEVELOPMENT

- Estate Management Services
- Property Consultant

Eaglesberg Project and Services Limited manages Rehoboth Villa, Sterling Park Estate and Stonehenge Estate.
